

AMENDMENTS TO SPECIFICATION

Page 17, line 21 to Page 18, line 5:

The information about the target BER of each packet is transmitted with video information, and so, it can be informed to a switch or a ~~router~~ router for the FEC of the wired channel and can be informed to a base station or a mobile station for the FEC or the transmitted power controlling of the wireless channel. (19) This information can be transmitted through the dedicated control channel, or transmitted through the header or tailer of a previous transmission packet.
